

Milliken®

Keyplast™

Granite Effects Colorants

Milliken features several lines of specialty colorants including its Keyplast Granite special effect fibers. These rayon fibers are designed to give a textured or stone like effect to a variety of substrates. They can be used to add a natural or distinctive look to paper stock, add a beautiful textured look to coatings, casting resins, and a variety of plastics, or as a level of security in legal or financial documents.

Custom colors are available including natural uncolored fibers (minimum order requirements). Potential applications of polymer rheology modification, Surface appearance modification, or special effects modification may be possible.

NAME	DENIER	LENGTH
Keyplast Granite MPC Black*	3	0.03"
Keyplast Granite Black Long	25	0.08"
Keyplast Granite Black Short	25	0.015"
Keyplast Granite Brown	3	0.03"
Keyplast Granite Brown Short	3	0.015"

* Food contact compliant under 21 CFR Sec. 178.3297

Product Specifications

Denier — This is the property which determines the thickness of the fiber. The higher the value the thicker the fiber. The standard denier is 3 except where noted.

Length — The length, in inches, to which the fiber is cut. The tolerance is +/- 0.005" of the specified value. The fibers can be cut from 0.015" to 0.25". A small denier at a long length is generally not recommended.

PLEASE NOTE: As each customer's use of our product may be different, information we provide, including without limitation, recommendations, test results, samples, care/labeling/processing instructions or marketing advice, is provided in good faith but without warranty and without accepting any responsibility/liability. Each customer must test and be responsible for its own specific use, further processing, labeling, marketing, etc. All sales are exclusively subject to our standard terms of sale posted at www.milliken.com/terms (all additional/different terms are rejected) unless explicitly agreed otherwise in a signed writing.
